CAGE: 1SND4

CAPABILITIES

Equitech-Bio Inc. supplies high-purity biological reagents to research laboratories, diagnostic facilities, and academic institutions worldwide. Products encompass a wide range of animal-derived blood components and related materials used across medical and scientific research platforms. Expertise includes the manufacturing of albumins, sera, plasma, and immunoglobulins, as well as custom polyclonal antisera production and advanced serum fractionation services. The company also provides custom manufacturing for reference standards and diagnostic controls, supported by USDA-approved and ISO 13485:2016-certified processes that ensure consistent quality. With additional capabilities in contract manufacturing and private-label services, Equitech-Bio Inc. delivers tailored solutions that meet the complex demands of the biotechnology and diagnostic industries.

OUR MISSION

Equitech-Bio, Inc. is committed to excellence through consistent quality, integrity, and teamwork. By upholding strict standards, fostering positive collaboration, and engaging with innovative ideas, the company ensures reliable products, satisfied customers, and continuous improvement built on humility and respect.

NAICS CODES

Primary NAICS: 325414 - Biological Product (Except Diagnostic) Manufacturing

Secondary NAICS: TBD

CORE COMPETENCIES

- Manufacturing Of Biological Reagents Including Albumins, Sera, Plasma, And Immunoglobulins (IgGs)
- Custom Polyclonal Antisera Production
- Serum Processing And Advanced Fractionation Services
- Custom Manufacturing For Reference Standards And Diagnostic Controls
- USDA-Approved And ISO 13485:2016-Certified Production And QA Processes
- Contract Manufacturing And Private-Label Services For Diagnostic Manufacturers

DIFFERENTIATORS

Equitech-Bio Inc. brings more than 30 years of service to the life sciences industry with a reputation built on quality, transparency, and ethical practices. Full control of the supply chain, from animal care through final production, ensures every reagent is consistent, traceable, and manufactured to the highest purity. Operations meet stringent regulatory and quality management standards, positioning the company as a trusted partner for leading vaccine manufacturers and research institutions worldwide.
